NANO JUMPER

Make the cue ball take flight with our Nano jump cue.

This jump cue is extremely light, excelling at close range jumping. It has a twill carbon fiber handle with a carbon jump shaft. The cue is designed with a finger groove for use with the dart technique. It has a black phenolic one-piece tip which is extremely hard, increasing its jumping ability.

Tip/Ferrule: Black phenolic tip X 0.400" Long, solid, one-piece ferrule/tip combo

Shaft: Nano Jump shaft - Unidirectional carbon fiber with foam center.

Tip: 13.1mm diameter Phenolic one-piece hard tip

Joint Pin: Aluminum Radial

Joint Diameter: 0.847"

Joint Material: 1 1/2" Capped Tigerstripe

Length: 40" - 29" shaft / 11" butt

Available Colors: Twill carbon fiber with stained gray joint and cap

Weight Range: 4.4 - 4.8 oz Natural weight range (3.0 oz shaft / 1.6 oz handle)

Weight System: None

Bumper: 5/8 stem push in bumper
